Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 76 (1991)

ABA analogues, abscisic acid, abscisyl alcohol, spruce, *Picea*, somatic embryo maturation, 219
Abscisic acid, abscisyl alcohol, ABA analogues, spruce, *Picea*, somatic embryo maturation, 219
Abscisyl alcohol, abscisic acid, ABA analogues, spruce, *Picea*, somatic embryo maturation, 219
Acclimatization, micropropagation, morphology, quality assessment, root system, 259
Acer pseudoplatanus, flusilazol, penconazole, tonoplast, 167
Aesculus hippocastanum, embryoids, chilling, regeneration, 139
Agrobacterium, gene expression, light-dependent metallothionein, tissue-specific tobacco, 99
Amino acid sequence, barley grain, in vitro cultures, endochitinases, β-1,3-endoglucanase, secretion, 65
Anther, *Asparagus officinalis*, antibodies, antigens, dioecism, 267
Antibodies, anther, *Asparagus officinalis*, antigens, dioecism, 267
Antigens, anther, *Asparagus officinalis*, antibodies, dioecism, 267
Asparagus officinalis, anther, antibodies, antigens, dioecism, 267
Assimilate allocation, fruit, *Lycopersicon esculentum*, protoplast-isolation, sink, sugar uptake, 9

Barley grain, amino acid sequence, in vitro cultures, endochitinases, β-1,3-endoglucanase, secretion, 65
Beta vulgaris, water relation, hydraulic conductivity, cell wall, denaturation, 229
Bound enzymes, cell wall, solubilized enzymes, β-glucosidase kinetics, pH optima, 185

Callus, *Triticum aestivum* L., leaf, light-effect, mitochondrial polypeptides, two-dimensional electrophoresis, 159
Calmodulin, monoclonal antibodies, proteolysis, 175
Carnation, DNA fingerprints, minisatellites, microsatellites, ornamentals, 91
cDNA cloning, rice chitinase, stress-inducible gene, multigene family, codon usage, *Oryza sativa*, 211
Cell suspension cultures, *Penstemon serrulatus*, *Scrophulariaceae*, iridoid glucosides, penstemide and serrulatoloside, 249
Cell wall, bound enzymes, solubilized enzymes, β-glucosidase kinetics, pH optima, 185
Cell wall, water relation, hydraulic conductivity, denaturation, *Beta vulgaris*, 229
Chilling, *Aesculus hippocastanum*, embryoids, regeneration, 139
Chlorate, mutant, selection, nitrate assimilation, *Nicotiana plumbaginifolia*, 109
Cicer arietinum L. cv. Castellana, exogenous calcium, cytokinins, endogenous calcium, seed germination, 57
CO_2 reduction to formate, green potato tuber chloroplasts, cyanide-treated chloroplasts, natural endogenous electron donors for PSI, pyruvate and chlorogenic acid oxidase, 79
Codon usage, rice chitinase, cDNA cloning, stress-inducible gene, multigene family, *Oryza sativa*, 211
Cyanide-treated chloroplasts, green potato tuber chloroplasts, natural endogenous electron donors for PSI, pyruvate and chlorogenic acid oxidase, CO_2 reduction to formate, 79
Cytochrome *c* reductase, *Funaria*, NADPH-NR, molybdenum, NR partial activities, 19
Cytokinins, *Cicer arietinum* L. cv. Castellana, exogenous calcium, endogenous calcium, seed germination, 57

Denaturation, water relation, hydraulic conductivity, cell wall, *Beta vulgaris*, 229
Dioecism, anther, *Asparagus officinalis*, antibodies, antigens, 267
Dioscorea cayenensis, starch phosphorylase, yam, tubers, 1
DNA fingerprints, minisatellites, microsatellites, ornamentals, carnation, 91

Effector, *Saprolegnia monoica*, glucan synthase, 193
Electrofusion, *Solanum tuberosum*, *Solanum berthaultii*, protoplast, somatic hybridization, 115
Electron microscopy, *Zea mays*, maize, nuclear matrix, lamina, transcriptional activity, 35
Embryoids, *Aesculus hippocastanum*, chilling, regeneration, 139
Endochitinases, amino acid sequence, barley grain, in vitro cultures, β-1,3-endoglucanase, secretion, 65
Endogenous calcium, *Cicer arietinum* L. cv. Castellana, exogenous calcium, cytokinins, seed germination, 57
β-1,3-Endoglucanase, amino acid sequence, barley grain, in vitro cultures, endochitinases, secretion, 65
Essential oil, *Mentha piperita*, leaf ontogeny, phytosynthetic carbon assimilation $^{14}CO_2$ incorporation, primary and secondary metabolities, 153
Exogenous calcium, *Cicer arietinum* L. cv. Castellana, cytokinins, endogenous calcium, seed germination, 57

Fluorescence, photosystem II, orthophosphate, quantum yield, starchless mutant, 143

Flusilazol, *Acer pseudoplatanus*, penconazole, tonoplast, 167
Fruit, assimilate allocation, *Lycopersicon esculentum*, protoplast-isolation, sink, sugar uptake, 9
Funaria, NADPH-NR, molybdenum, NR partial activities, cytochrome *c* reductase, 19
Fungal toxin, protoplasts, *Zea mays*, *Helminthosporium carbonum*, 127

Gene expression, *Agrobacterium*, light-dependent metallothionein, tissue-specific tobacco, 99
Glucan synthase, *Saprolegnia monoica*, effector, 193
β-Glucosidase kinetics, cell wall, bound enzymes, solubilized enzymes, pH optima, 185
Green potato tuber chloroplasts, cyanide-treated chloroplasts, natural endogenous electron donors for PSI, pyruvate and chlorogenic acid oxidase, CO_2 reduction to formate, 79

Helminthosporium carbonum, fungal toxin, protoplasts, *Zea mays*, 127
Hordeum vulgare, phosphorus stress, nitrate uptake, phosphorus-nitrate interactions, 43
Hydraulic conductivity, water relation, cell wall, denaturation, *Beta vulgaris*, 229

Imidodiphosphate, pyrophosphatase, photosynthesis, sucrose synthesis, 49
In vitro cultures, amino acid sequence, barley grain, endochitinases, β-1,3-endoglucanase, secretion, 65
Iridoid glucosides, *Penstemon serrulatus*, *Scrophulariaceae*, cell suspension cultures, penstemide and serrulatoloside, 249

K^+ uptake, *Zea mays*, spermidine, plasma membrane, 85

Lamina, *Zea mays*, maize, nuclear matrix, transcriptional activity, electron microscopy, 35
Leaf, *Triticum aestivum* L., callus, light-effect, mitochondrial polypeptides, two-dimensional electrophoresis, 159
Leaf ontogeny, *Mentha piperita*, essential oil, phytosynthetic carbon assimilation $^{14}CO_2$ incorporation, primary and secondary metabolities, 153
Light-dependent metallothionein, *Agrobacterium*, gene expression, tissue-specific tobacco, 99
Light-effect, *Triticum aestivum* L., callus, leaf, mitochondrial polypeptides, two-dimensional electrophoresis, 159
Lycopersicon esculentum, assimilate allocation, fruit, protoplast-isolation, sink, sugar uptake, 9

Maize, *Zea mays*, nuclear matrix, lamina, transcriptional activity, electron microscopy, 35
Mentha piperita, leaf ontogeny, essential oil, phytosynthetic carbon assimilation $^{14}CO_2$ incorporation, primary and secondary metabolities, 153
Micropropagation, morphology, quality assessment, acclimatization, root system, 259
Micropropagation, *Solanum tuberosum*, somaclonal variation, regeneration, RFLP analysis, 239
Microsatellites, DNA fingerprints, minisatellites, ornamentals, carnation, 91
Minisatellites, DNA fingerprints, microsatellites, ornamentals, carnation, 91
Mitochondrial polypeptides, *Triticum aestivum* L., callus, leaf, light-effect, two-dimensional electrophoresis, 159
Molybdenum, *Funaria*, NADPH-NR, NR partial activities, cytochrome *c* reductase, 19
Molybdenum cofactor, nitrate reductase, mutant, 201
Monoclonal antibodies, calmodulin, proteolysis, 175
Morphology, micropropagation, quality assessment, acclimatization, root system, 259
Multigene family, rice chitinase, cDNA cloning, stress-inducible gene, codon usage, *Oryza sativa*, 211
Mutant, nitrate reductase, molybdenum cofactor, 201
Mutant, selection, chlorate, nitrate assimilation, *Nicotiana plumbaginifolia*, 109

NADPH-NR, *Funaria*, molybdenum, NR partial activities, cytochrome *c* reductase, 19
Natural endogenous electron donors for PSI, green potato tuber chloroplasts, cyanide-treated chloroplasts, pyruvate and chlorogenic acid oxidase, CO_2 reduction to formate, 79
Nicotiana plumbaginifolia, mutant, selection, chlorate, nitrate assimilation, 109
Nitrate assimilation, mutant, selection, chlorate, *Nicotiana plumbaginifolia*, 109
Nitrate reductase, molybdenum cofactor, mutant, 201
Nitrate uptake, phosphorus stress, phosphorus-nitrate interactions, *Hordeum vulgare*, 43
NR partial activities, *Funaria*, NADPH-NR, molybdenum, cytochrome *c* reductase, 19
Nuclear matrix, *Zea mays*, maize, lamina, transcriptional activity, electron microscopy, 35

Ornamentals, DNA fingerprints, minisatellites, microsatellites, carnation, 91
Orthophosphate, fluorescence, photosystem II, quantum yield, starchless mutant, 143
Oryza sativa, rice chitinase, cDNA cloning, stress-inducible gene, multigene family, codon usage, 211

PEG/dextran systems, phosphoenolpyruvate carboxylase, 29
Penconazole, *Acer pseudoplatanus*, flusilazol, tonoplast, 167
Penstemide and serrulatoloside, *Penstemon serrulatus*, *Scrophulariaceae*, cell suspension cultures, iridoid glucosides, 249
Penstemon serrulatus, *Scrophulariaceae*, cell suspension cultures, iridoid glucosides, penstemide and serrulatoloside, 249
Phosphoenolpyruvate carboxylase, PEG/dextran systems, 29
Phosphorus-nitrate interactions, phosphorus stress, nitrate uptake, *Hordeum vulgare*, 43
Phosphorus stress, nitrate uptake, phosphorus-nitrate interactions, *Hordeum vulgare*, 43
Photosynthesis, imidodiphosphate, pyrophosphatase, sucrose synthesis, 49

Photosystem II, fluorescence, orthophosphate, quantum yield, starchless mutant, 143
Phytosynthetic carbon assimilation $^{14}CO_2$ incorporation, *Mentha piperita*, leaf ontogeny, essential oil, primary and secondary metabolities, 153
pH optima, cell wall, bound enzymes, solubilized enzymes, β-glucosidase kinetics, 185
Picea, abscisic acid, abscisyl alcohol, ABA analogues, spruce, somatic embryo maturation, 219
Plasma membrane, *Zea mays*, spermidine, K^+ uptake, 85
Primary and secondary metabolities, *Mentha piperita*, leaf ontogeny, essential oil, phytosynthetic carbon assimilation $^{14}CO_2$ incorporation, 153
Proteolysis, calmodulin, monoclonal antibodies, 175
Protoplast-isolation, assimilate allocation, fruit, *Lycopersicon esculentum*, sink, sugar uptake, 9
Protoplasts, fungal toxin, *Zea mays*, *Helminthosporium carbonum*, 127
Pyrophosphatase, imidodiphosphate, photosynthesis, sucrose synthesis, 49
Pyruvate and chlorogenic acid oxidase, green potato tuber chloroplasts, cyanide-treated chloroplasts, natural endogenous electron donors for PSI, CO_2 reduction to formate, 79

Quality assessment, micropropagation, morphology, acclimatization, root system, 259
Quantum yield, fluorescence, photosystem II, orthophosphate, starchless mutant, 143

Regeneration, *Aesculus hippocastanum*, embryoids, chilling, 139
Regeneration, *Solanum tuberosum*, somaclonal variation, micropropagation, RFLP analysis, 239
RFLP analysis, *Solanum tuberosum*, somaclonal variation, micropropagation, regeneration, 239
Rice chitinase, cDNA cloning, stress-inducible gene, multigene family, codon usage, *Oryza sativa*, 211
Root system, micropropagation, morphology, quality assessment, acclimatization, 259

Saprolegnia monoica, glucan synthase, effector, 193
Scrophulariaceae, *Penstemon serrulatus*, cell suspension cultures, iridoid glucosides, penstemide and serrulatoloside, 249
Secretion, amino acid sequence, barley grain, in vitro cultures, endochitinases, β-1,3-endoglucanase, 65
Seed germination, *Cicer arietinum* L. cv. Castellana, exogenous calcium, cytokinins, endogenous calcium, 57
Selection, mutant, chlorate, nitrate assimilation, *Nicotiana plumbaginifolia*, 109
Sink, assimilate allocation, fruit, *Lycopersicon esculentum*, protoplast-isolation, sugar uptake, 9
Solanum berthaultii, *Solanum tuberosum*, protoplast, somatic hybridization, electrofusion, 115
Protoplast, *Solanum tuberosum*, *Solanum berthaultii*, somatic hybridization, electrofusion, 115
Solanum tuberosum, *Solanum berthaultii*, protoplast, somatic hybridization, electrofusion, 115
Solanum tuberosum, somaclonal variation, micropropagation, regeneration, RFLP analysis, 239
Solubilized enzymes, cell wall, bound enzymes, β-glucosidase kinetics, pH optima, 185
Somaclonal variation, *Solanum tuberosum*, micropropagation, regeneration, RFLP analysis, 239
Somatic embryo maturation, abscisic acid, abscisyl alcohol, ABA analogues, spruce, *Picea*, 219
Somatic hybridization, *Solanum tuberosum*, *Solanum berthaultii*, protoplast, electrofusion, 115
Spermidine, *Zea mays*, K^+ uptake, plasma membrane, 85
Spruce, abscisic acid, abscisyl alcohol, ABA analogues, *Picea*, somatic embryo maturation, 219
Starchless mutant, fluorescence, photosystem II, orthophosphate, quantum yield, 143
Starch phosphorylase, yam, tubers, *Dioscorea cayenensis*, 1
Stress-inducible gene, rice chitinase, cDNA cloning, multigene family, codon usage, *Oryza sativa*, 211
Sucrose synthesis, imidodiphosphate, pyrophosphatase, photosynthesis, 49
Sugar uptake, assimilate allocation, fruit, *Lycopersicon esculentum*, protoplast-isolation, sink, 9

Tissue-specific tobacco, *Agrobacterium*, gene expression, light-dependent metallothionein, 99
Tonoplast, *Acer pseudoplatanus*, flusilazol, penconazole, 167
Transcriptional activity, *Zea mays*, maize, nuclear matrix, lamina, electron microscopy, 35
Triticum aestivum L., callus, leaf, light-effect, mitochondrial polypeptides, two-dimensional electrophoresis, 159
Tubers, starch phosphorylase, yam, *Dioscorea cayenensis*, 1
Two-dimensional electrophoresis, *Triticum aestivum* L., callus, leaf, light-effect, mitochondrial polypeptides, 159

Water relation, hydraulic conductivity, cell wall, denaturation, *Beta vulgaris*, 229

Yam, starch phosphorylase, tubers, *Dioscorea cayenensis*, 1

Zea mays, fungal toxin, protoplasts, *Helminthosporium carbonum*, 127
Zea mays, maize, nuclear matrix, lamina, transcriptional activity, electron microscopy, 35
Zea mays, spermidine, K^+ uptake, plasma membrane, 85
